The Santa Fe Compact

Sells for \$1200.00 installed. If a pump out kit is required, Additional \$150.00

- Designed for crawlspaces
- Low-clearance design
- High capacity, energy efficient dehumidification

Compact and Powerful Dehumidification For Crawlspaces

Studies have shown that as much as 50% of the air in your home comes up from your basement or crawlspace. This air is often higher in relative humidity, and carries with it various allergens and musty odors. When conditions linger above 60% relative humidity for extended periods of time, mold, mildew, and bacteria growth is stimulated.

The American Lung Association, American Medical Association, and the EPA recommend maintaining relative humidity level in the 30% - 50% range. Ventilation and air conditioning alone cannot provide the protection offered by a premium dehumidifier like the Sante Fe Compact.TM Protecting your family, and your biggest investment, is worth the best.

Application Specific Design

The Sante Fe Compact was specifically designed for crawlspaces. At 13" tall and 12" wide, the Sante Fe Compact can fit when no other dehumidifier can. The Compact's horizontal configuration and flow-through design perform exceptionally well in tight crawlspaces. The optional condensate pump and duct kits provide the installation flexibility necessary for the most challenging applications. No mass-merchant dehumidifier can perform as efficiently and effectively in crawlspaces as the Sante Fe Compact.

Energy Star Listed

The high efficiency Sante Fe Compact produces over 4 pints per kilowatt-hour, far better than mass merchant dehumidifiers. Better efficiency means lower operating cost – in many cases saving hundreds of dollars per year in electricity.

Low Temp Operation

The Sante Fe Compact was engineered for crawlspaces, and the temperature and air flow issues that they present. When many mass-merchant dehumidifiers have stopped removing water from the air, the Sante Fe Compact keeps on protecting you and your home.

Superior Filtration

MERV-11 filtration is standard on the Sante Fe Compact, capturing particles (including mold spores) down to 1 micron in size. This superior level of air filtration also keeps the Sante Fe Compact working at peak efficiency for longer than other devices with cheaper designs.

Amp Draw:	5.5 Amps
Capacity at AHAM:	65 pints/day
Capacity at Saturation:	130 pints/day
CFM:	190
Dimensions:	21"W x 12"L x 12"H
Duct Collars:	Option
Humidistat:	Yes
Operating Temp. Range:	40° - 95°F
Pump:	Option
Shipping Weight:	70 lbs
Sound Level:	63.2 dB
Unit Weight:	55 lbs
Warranty:	3 + 2 Year Limited
